

## Centerburg Robotics Club Field Trip to Mettler -Toledo

The Robotics club has been invited to a tour of facilities of Mettler Toledo on Huntley Road, Route 161, Columbus. Mettler Toledo is a manufacturer of precision instruments for industry and retail.

The tour will begin on Friday, January 23<sup>rd</sup> at 1:00. Students attending the tour will be leaving the high school at approximately 12:00. High School lunch begins at 11:44. Students should bring a sack lunch that day so that they will have finished eating in time to leave the school at 12:00. They will be returning to the high school around 3:30, but the time is estimated, so they will be calling to let you know their exact arrival time.

Students will need to stop by the high school office and obtain a Request for Special Absence from the secretary. They will be in school for the first five periods and missing the final three periods. Transportation will be provided by parent volunteers in private vehicles. Any parents wishing to attend are welcome.

The Emergency Medical Authorization Form must be filled out and returned for the student to be allowed to attend.

Contact Scott or Michelle Trumble 625-6361 with any questions.
